

# HeadStart

for **EWE & LAMB VIGOUR**

## Formulated specifically for the Ewe and unborn Lamb

A unique formulation for breeding ewes which will provide lots of available energy needed and vigour at times of breeding and stress. Designed to aid lambing and help produce the birth of healthy vigorous lambs. Feed to ewes prior to lambing, Headstart:

### Boosts Colostrum

### Boosts Lamb Vigour

### Boosts Protection

For the critical periods before and after lambing, at housing or when coming home from winter grazing. These are periods when ewes are under pressure and may succumb to problems such as twin lamb and other stress related problems.

Headstarts highly palatable formula ensures good intakes and maximum bio-availability to the ewe and unborn lamb. Its unique formula contains a blend of immunity enhancing Kestrel antioxidants developed by Inform Nutrition Ireland for the unborn lamb. Headstart gives lambs the headstart they need in life, the bottom line being vigorous lambs are born which are quicker to suckle.
